PERAN DUKUNGAN SUAMI DALAM PELAKSANAAN INISIASI MENYUSU DINI Ni Gusti Kompiang Sriasih<sup>1</sup>, Ni Nyoman Suindri<sup>2</sup>, Ni Wayan Ariyani<sup>3</sup> Abstract. Early initiation of breastfeeding is the effort of learning to breastfeed the baby from the first few days after birth. The purpose of this study was to determine the relationship of husband support the implementation of the early initiation, of breastfeeding.

This research is a quasi experimental with posttest control group design. The population is all the husband and pregnant woman in health center Dauh Puri and GA. Widiasih clinical practice. Techniques Consecutive sampling was used. The results showed statistically significant that there is a relationship between husband's breastfeeding initiation. Which support poor husband has a risk of failure Early initiation of breastfeeding 7 times larger than the support of a wonderful husband (OR=7,95%, CI : 3.11 to 15.76).

So it is advisable to health workers should be counseling husbands pregnant woman to their
