KAJIAN INDIKASI PERSALINAN DENGAN SECTIO CAESAREA DI RUMAH SAKIT UMUM PREMAGANA GIANYAR Reena Roy<sup>1</sup>, NGK Sriasih<sup>2</sup>, Made Widhi GD3 Abstract.

Practitioners can expect that pregnant women will have a normal delivery but must acknowledge the reality that a caesarean might be medically necessary. The last few years there is a tendency for Caesarean performed for a variety of reasons such as maternal indications, fetal indications or without medical indication.

This study is aimed to identify the proportion of women giving birth by Caesarean section without a medical indication. This study was conducted from November 2013 to January 2014. A sample of 430 medical records from mothers that delivered by Caesarean in General Hospital Premagana were reviewed.

This study was a descriptive study in which shows the proportion of women giving birth by Caesarean. The result showed a total of 51,2% women giving birth in General Hospital Premagana by Caesarean based on maternal request in the absence of family or medical indicat
